

LONDON ABERDEEN BELFAST DUBLIN GLASGOW MÜNSTER MUNICH NICE YORK

YORK

The position

Murgitroyd & Company considers itself Europe's most innovative Patent and Trade Mark Attorney practice. With offices in Ireland, UK, Germany and France its pan-European expansion has developed rapidly over the last few years. The company is looking for qualified staff to join its York Office, particularly those that can handle chemical subject matter. Interested individuals should be European Patent Attorneys.

The company

Founded as recently as 1975, Murgitroyd & Company now has around 200 staff and eight offices in six countries and directly represents its clients before the Irish, UK, French, German, Dutch and European Patent Offices. As a full service Attorney practice it also represents its clients' Trade Mark interests before the OHIM in Spain. Although based in different geographical locations, Murgitroyd & Company operates as a single organisation offering its clients, wherever located, access to a single "pool" of "European" Attorneys.

The client base

Almost 90% of Murgitroyd & Company's turnover is generated from "non-agency" work, i.e. from direct clients. Of this, much is generated from representing the European IP interests of US and Japanese multi-national companies.

The culture

Murgitroyd & Company is a company wholly owned by Murgitroyd Group PLC, whose shares are publicly traded on the London Stock Exchange. Murgitroyd & Company is structured and run as a corporate entity with a flat hierarchy that best facilitates its dynamic development. Such a culture suits Attorneys wishing to work in a modern, unrestricted environment and be involved in day-to-day policy and decision making.

The opportunity

As the company continues its publicly stated strategy of pan-European expansion, opportunities exist for all its people meaning that, tangibly, career prospects are excellent. These will reflect individuals' involvement in the growth and development of the company and will be determined with reference to their contributions in this regard. Remuneration packages on offer are highly competitive.
